PROFESSIONAL SUMMARY

CSE graduate (USICT, GGSIPU, 2026). Shipped two live products on **React**, **Next.js**, **Node.js**, and **MongoDB**, a real-time collaborative editor (**Yjs**, **Socket.io**, **Redis**) and an AI mock-interview platform with rubric grading. Immediate joiner.

EDUCATION

Bachelor of Technology – Computer Science and Engineering
USICT, Guru Gobind Singh Indraprastha University, New Delhi — July 2022 – July 2026

PROJECTS

OfferForge AI – *Full-Stack AI Mock Interview Platform* — Live Code

- **Structured interview loops:** Built role-specific rounds for 7 tracks (SDE, frontend, backend, data, product) as ordered sections such as DSA, system design, OOP, SQL, and behavioral, with a fixed question count and level (entry, mid, senior).
- **Rubric grading:** Designed a Gemini and OpenRouter pipeline that scores each answer on a 4-criterion section rubric, then returns strengths, gaps, a model answer, and a hire recommendation, falling back to a curated question bank instead of a fake score when the model is down.
- **Session integrity:** Implemented JWT auth on MongoDB and a server-held question flow with atomic submit, skip, and complete, plus a dashboard of per-section averages and score trend; shipped the React/Vite client and Express API on Vercel.

SyncFlow – *Real-Time Collaborative Workspace* — Live Code

- **Serverless sync engine:** Built a multiplayer block editor in **Next.js 16**, **TypeScript**, and **BlockNote** that runs entirely on **Vercel**. Wrote a custom **Yjs** provider that syncs over HTTP with adaptive polling (350ms while typing) and one **Postgres** transaction per round trip.
- **No lost edits:** Stored changes in an append-only log on **Neon Postgres** with a 3-second settle window so concurrent edits are never skipped, plus background compaction into snapshots; covered by **Vitest** tests against an in-memory Postgres.
- **Sharing:** Shipped live cursors and presence, rotatable share links, email invites that wait for sign-up, and file sharing on **Vercel Blob**.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks	React.js, Next.js 15, Node.js, Express.js, Socket.io, Tailwind CSS
Databases & Cloud	MongoDB, MySQL, Redis, Docker, Vercel, Render
Tools & DevOps	RESTful APIs, Microservices, JWT Authentication, Webhooks, CI/CD Pipeline, Git, Postman
Fundamentals	Data Structures & Algorithms (200+ problems solved), System Design (HLD/LLD), Database Management System, Operating Systems, Computer Networks

PROGRAMS & CERTIFICATIONS

IBM Web Development Program – *Front-End Engineering Track* — *July 2025 – August 2025*

- Completed industry-led, project-based training in **React.js**, **TypeScript**, and **Tailwind CSS**, applying production-grade patterns including component architecture, state management, and accessibility standards.
