PROFESSIONAL SUMMARY

Computer Science Engineer with hands-on experience building production-grade full-stack systems using **React**, **Next.js 15**, **Node.js**, and **MongoDB**, with a focus on clean architecture, scalable cloud deployments, and CI/CD pipelines.

EDUCATION

Bachelor of Technology – Computer Science and Engineering

USICT, Guru Gobind Singh Indraprastha University, New Delhi

July 2022 – July 2026

PROJECTS

SyncFlow – *Real-Time AI Collaborative Workspace*

[Live Demo](#)

- Real-Time Sync Engine:** Built a collaborative block editor using **Next.js 15**, **TypeScript**, and **Socket.io**, backed by **Upstash Redis** for sub-10ms cache invalidation and **MongoDB Atlas** for atomic document persistence across concurrent multi-tenant rooms.
- Streaming AI Copilot:** Designed a **Server-Sent Events (SSE)** pipeline over **Gemini Flash API** for chunked token streaming, enabling live inline text generation, summarization, and proofreading with minimal perceived latency.
- Security & Export Pipeline:** Implemented **JWT/bcrypt** authentication, cryptographic token-based room sharing, live socket session revocation, and multi-format client export (.md, .html, PDF, ZIP) via **Express.js**.

OfferForge AI – *Full-Stack AI Interview & Career Platform*

[Live Demo](#)

- Multimodal AI Engine:** Architected microservices on **Gemini Flash** with multi-LLM fallback cascade (OpenRouter), real-time speech telemetry, and dynamic evaluation rubrics, reducing average inference latency by **40%**.
- AI Job Copilot & ATS Optimizer:** Built an automated pipeline that extracts skill gaps from target job descriptions (JDs), generates tailored cold outreach for Wellfound/LinkedIn, and produces a **95%+ ATS-passing** resume in one click.
- Code Sandbox & System Design Module:** Developed a multi-language IDE covering **100+** DSA patterns and an interactive system design lab (Redis Lua rate limiters, consistent hashing), deployed on **Vercel** with sub-50ms REST APIs and **99.9% uptime**.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks	React.js, Next.js 15, Node.js, Express.js, Socket.io, Tailwind CSS
Databases & Cloud	MongoDB, MySQL, Redis (Upstash), Docker, Vercel, Render
Tools & DevOps	RESTful APIs, Microservices, JWT Authentication, Webhooks, CI/CD, Git, Postman
Fundamentals	Data Structures & Algorithms (150+ problems solved), System Design (HLD/LLD), DBMS, OS, Computer Networks

PROGRAMS & CERTIFICATIONS

IBM Web Development Program – *Front-End Engineering Track*

July 2025 – August 2025

- Completed industry-led, project-based training in **React.js**, **TypeScript**, and **Tailwind CSS**, applying production-grade patterns including component architecture, state management, and accessibility standards.
